# A BETTER WORLD OF WORK FOR EVERYONE

# Diversity. Equity. Inclusion.

## Why DEI matters to us

If the tech world is driving innovation and creating limitless possibilities, the real world needs to set the stage. Embracing diversity, fostering equity, and nurturing an inclusive culture should be the norm, but if you need some convincing - it will increase innovation, improve market intelligence and expand your audience exponentially.

At Talent, we believe that the most successful organizations are those that welcome unique perspectives, harness the collective brilliance of their teams, and champion an environment where everyone feels valued and heard.

# The DEI Roundtable.

Community-driven DEI: Driving change together

## About the DEI Roundtable:

The DEI Roundtable event series brings people and organisations together to talk about what DEI means for them and the steps they are taking to tackle barriers to fair opportunities.

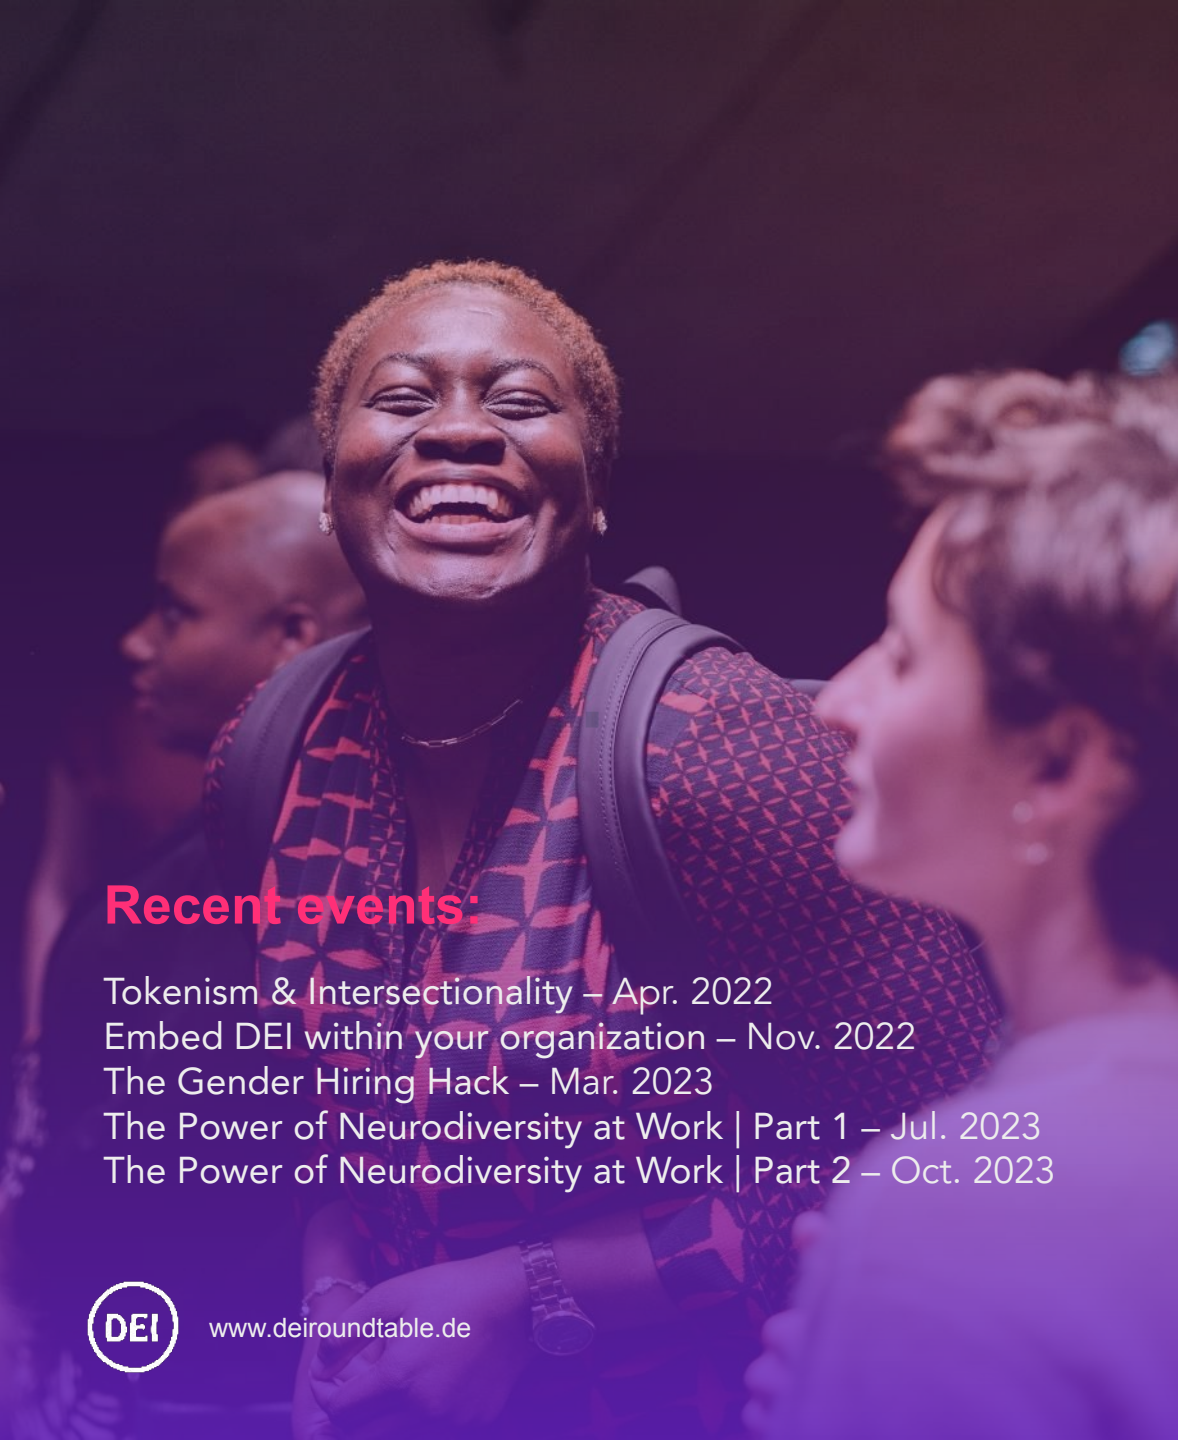

The events aim to equip attendees with knowledge, partnerships and resources to help drive diversity and inclusion efforts at both an individual and corporate level.

## Our Purpose:

The event series was created by Talent to address the lack of representation within Europe's technology ecosystem through collective action.

Our goal is for the ecosystem to be a diverse and inclusive community where people from all backgrounds are welcomed and valued for their contributions.
